

Please do not allow our Wisconsin No Call List to be eliminated. Before the list was available we were receiving so many calls that we opted to have caller id added to our phone just so we knew when not to pick it up. The calls continued, but at least I was not having to waste my time telling these people I am not interested. I do not infringe on their privacy and they should not on mine. If I want to purchase something I will inquire about it first. Keep Wisconsin's No Call List active!
